

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

LETTER

FROM

THE SECRETARY OF THE INTERIOR,

TRANSMITTING,

In response to Senate resolution of April 5, 1886, information relative to the means and cost of distributing public documents.

JUNE 17, 1886.—Referred to the Committee on Printing and ordered to be printed.

DEPARTMENT OF THE INTERIOR,

Washington, June 16, 1886.

SIR: In response to the resolution of the Senate of the 5th of April—

Resolved, That the Secretary of the Interior be directed to furnish to the Senate the name of each person employed in receiving, folding, and distributing public documents, together with their compensation, and all other expenditures made on that account for the fiscal years 1883, 1884, and 1885. And also to communicate to the Senate such additional information or suggestions as in his judgment will be of advantage to Congress in the matter of legislation touching the printing and distribution of public documents—

I have the honor to submit the following report.

The force employed in receiving, folding, and distributing public documents during the period above noted and compensation paid the same were :

During the fiscal year ending June 30, 1883.

John G. Ames, superintendent of documents	\$2,000 00
John Long, clerk	1,200 00
Mrs. Mary Fuller, copyist	900 00
Mrs. Mary P. Winslow, copyist and stenographer	885 00
Miss A. H. Beals, copyist, 4 months	300 00
Miss H. S. Murray, copyist, 4½ months	315 00
Miss J. W. Turner, copyist, 4½ months	315 00
Mrs. M. B. Crouch, copyist, 3½ months	265 00
John F. Ford, in charge of folding-rooms	900 00
John K. Brown, packer	720 00
John Wood, packer	720 00
Henry M. Middleton, laborer, 4½ months	248 33
Thomas H. Anderson, laborer, 2 months	100 00
G. McC. Fenwick, laborer, 3½ months	141 60
James H. Pitts, laborer, 2½ months	147 00
Cyrus B. Gallard, assistant messenger, 3½ months	202 00
Pierce Lafayette, assistant messenger	720 00

During the fiscal year ending June 30, 1884.

John G. Ames, superintendent of documents	2,000 00
John Long, clerk	1,200 00
Mrs. Mary Fuller, copyist	900 00

2 MEANS AND COST OF DISTRIBUTING PUBLIC DOCUMENTS.

Mrs. Mary P. Winslow, stenographer and type-writer, 3 months	\$225 00
Mrs. Anna L. Barr, stenographer and type-writer, 9 months	675 00
Mrs. M. B. Crouch, copyist, 13 days	31 80
Miss A. H. Beale, copyist	900 00
Miss H. S. Murray, copyist	880 00
Miss J. W. Turner, copyist	900 00
Miss N. C. Crosby, copyist, 6 months	450 00
Mrs. W. M. E. Smith, copyist, 11 months	865 00
Miss S. G. Browne, copyist, 6 months	450 00
Miss E. B. Foote, copyist, 5½ months	320 00
Charles W. Chapman, copyist, 5½ months	320 00
John F. Ford, in charge of folding-rooms	900 00
John K. Brown, packer	720 00
John Wood, packer	720 00
T. H. Anderson, laborer	660 00
G. McC. Fenwick, laborer	660 00
C. B. Galliard, laborer	660 00
J. H. Pendergrass, laborer, 11½ months	622 95
Henry M. Middleton, laborer, 15 days	24 00
Pierce Lafayette, assistant messenger	720 00

During the fiscal year ending June 30, 1885.

John G. Ames, superintendent of documents	\$2,000 00
John Long, clerk	1,200 00
Mrs. Mary Fuller, copyist	900 00
Mrs. W. M. E. Smith, copyist	900 00
Mrs. Anna L. Barr, stenographer and type-writer	900 00
Miss H. S. Murray, copyist	900 00
Miss J. W. Turner, copyist	900 00
Miss S. G. Brown, copyist	900 00
Miss L. M. Gibbs, copyist, 8½ months	708 00
Miss A. H. Beale, copyist, 9 months	600 00
Miss L. J. Ray, copyist, 3 months	250 00
Miss E. B. Foote, copyist, 10 days	20 00
John F. Ford, in charge of folding-rooms	1,193 00
John Wood, packer	660 00
John K. Brown, packer, 24 days	44 85
T. H. Anderson, packer	660 00
G. McC. Fenwick, packer	660 00
C. W. Scipio, packer, 11 months	605 00
C. B. Galliard, laborer	660 00
C. W. Chapman, laborer	66 00
J. H. Pendergrass, laborer	660 00
Pierce Lafayette, assistant messenger	720 00

The other expenditures on the part of this office, connected with the reception, storing, and distribution of public documents during the fiscal years 1883, 1884, and 1885 were as follows:

Rent of rooms	\$465 00
Printing, including blank books, blanks, &c	2,470 00
Stationery, including wrapping paper, twine, &c	5,944 00

The cost of transporting documents to the city post-office cannot be definitely stated, this work being done in connection with the general delivery service of the Department.

A register is kept showing the disposition made of every bound volume distributed, so arranged that it is possible in a moment to ascertain whether any individual or library in the world has been supplied by the office with any particular document, and, if so, the date of its transmission, upon whose order or request it was furnished, and, in most cases, the date of its reception by the party to whom it was sent.

It is only by such careful registration that duplication in the distribution of documents can be prevented as required by law. Under this system the duplication of more than 25,000 volumes of reports of the Tenth Census has been prevented.

ADDITIONAL INFORMATION AND SUGGESTIONS.

Regarding "additional information or suggestions" that may be of advantage to Congress in the matter of legislation touching public documents, it may be said that in the interest of economy and of the convenience both of members of Congress and of the public at large, there ought to be established some better system of distribution of the publications of the Government than that which has hitherto for the most part obtained. Were this work systemized, and certain changes not interfering with any public interest made in the standing orders of Congress for printing, a saving of \$200,000 per Congress could be effected, and results obtained equally as beneficial as those secured under present methods.

From \$600,000 to \$800,000 of the public money are now expended annually in printing and binding documents for gratuitous distribution, chiefly by members of Congress. It is probable that a much smaller expenditure and fewer documents would meet all reasonable demands on the part of the public. But if the past policy is to be continued, and from two million to three million volumes per Congress published to be given away, some plan ought to be devised which should effectually prevent the giving of two or more copies to the same party, while others equally deserving are thereby left unsupplied. One great evil connected with the present methods of distribution is this duplication of documents, an evil that cannot possibly be avoided as long as documents are distributed from different offices, each in ignorance of what the others are doing. The extent of such duplication is clearly shown by the data given above in regard to the reports of the Tenth Census. These reports were made distributable from one office in order to test this very question, and also that of the practicability of applying the same system to all public documents.

Duplication in the distribution of public documents is shown also by the fact that in the effort to supply deficiencies in sets of the Globe and Record in our public libraries, more than 6,000 volumes that were held in duplicate by these libraries have already been voluntarily turned over to the Department to aid in this work. Above 600 copies of the Agricultural Report have been received from a single library, and from another 400 copies of Patent Office Reports. These facts sufficiently indicate the extent to which duplication occurs under the present methods of distribution.

It is not probable that the proportion of duplication to the entire edition is less in the case of other documents ordered (as are most documents) for distribution by the Senate, the House of Representatives, and the Department or Bureau, and sometimes both, from which they emanate. The cost of a document does not apparently enter as an element into the consideration of the manner in which it shall be distributed, the same rule being applied to nearly all documents, let the cost per copy be what it may. Examples may be cited in the instance of the very large and valuable works recently issued on Vertebrata of the Tertiary Formations of the West, by Professor Cope, costing \$10 per copy, and on Cretaceous and Tertiary Floras of the Western Territories, by Professor Lesquereux, costing \$5 per copy, which are distributed from the Senate folding rooms, the House folding-rooms, the Department of the Interior, and the Geological Survey; so that it is possible for the same parties to secure four copies of these volumes, while in a short time it will be impossible for any one to obtain a single copy except on the payment of a large price.

4 MEANS AND COST OF DISTRIBUTING PUBLIC DOCUMENTS.

Duplication does not, however, result solely from the fact that documents are distributed from two or more offices. It is occasioned also by the fact that in many cases the same document is issued in two or more different editions, which are characterized by different titles. The Annual Report of the Director of the Geological Survey may be taken as an example in point, issued first as an executive document in the "usual number" edition of 1,900 copies, 806 copies being delivered unbound, the remainder bound in leather and delivered to the Senate, the House, and the Department of the Interior; issued again by the standing order of Congress, as one of the regular series of executive documents in cloth, 1,000 copies for the use of the Senate and 2,000 copies for the use of the House, and bearing on its back the title "Message and Documents Interior Department, Vol. 3, Report of the Director of the United States Geological Survey," and on the title page, "Report of the Secretary of the Interior; being part of the Message and Documents communicated to the two houses of Congress at the beginning of the first session of the Forty-eighth Congress. In four volumes. Volume 3." Issued again in a special edition by special order of Congress, that for 1883, 3,500 copies for the use of the Senate, 7,000 for the use of the House, and 5,000 for the use of the Geological Survey, and bearing on its back the title "United States Geological Survey, J. W. Powell, Director, Fourth Annual Report," and on its title page, "Fourth Annual Report of the United States Geological Survey to the Secretary of the Interior, by J. W. Powell, Director."

The Annual Report of the Commissioner of Education may be cited as another example, issued in the "usual number" edition of 1,900 copies, denominated on the back "Executive Documents, &c., Vol. 13, Education Report, 1883," again, in the regular cloth bound edition of 3,000 copies, denominated on the back, "Message and Documents, Interior Department, Vol. 4," and on the title page, "Report of the Secretary of the Interior, being part of the Message and Documents, &c., Vol. 4"; and issued also in a special edition, that for 1882-'83, 7,000 copies for the use of the Senate, 14,000 for the use of the House, and 20,000 for the use of the Bureau of Education, and denominated, "Report of the Commissioner of Education, 1882-'83." A fourth edition of these volumes is issued by the Department itself.

Of the annual reports of all the Executive Departments and Bureaus, the first two editions above named are issued, though of many the regular edition is much larger than that given, while it is probable that most of the Departments issue an edition for their own use.

This multiplicity of issues and variety of titles very largely increase duplication. It doubtless often happens that members of Congress misled thereby inadvertently send two or more copies of the same document to a constituent or library, while it is rendered easily practicable for parties desiring extra copies of any of these documents for personal ends to secure them.

Some better system in the matter of giving title to these several editions of the same document, and of other documents as well, would in part remedy this evil and also remove other inconveniences very often experienced by those consulting the reports of the Government.

It is undoubtedly true that many documents must be delivered in unbound form for the immediate use of Congress in current legislation, but, in the aggregate, these form only a small portion of those thus issued, chiefly reports of committees and certain of the current executive and miscellaneous documents. But that 800 or 900 copies each of the quarto volumes of the Tenth Census, of Records of the Rebellion, of the Offi-

cial Register of the United States, of the Annual Reports of the Bureau of Ethnology, of the Geological Survey, and of other costly scientific publications of the Government, and of such Annual Reports of Executive Departments as form each a separate and entire volume should be issued in unbound form, for such disposition as usually befalls these documents seems wholly unnecessary.

Reform in this matter will consist either in largely reducing the number issued unbound, carefully discriminating between those that are and those that are not required for immediate use in legislation, or in binding all documents which constitute each by itself an independent volume before they are sent from the Printing Office, thus making them available for general distribution. Had the latter been done during the last three Congresses, probably not less than 150,000 volumes would have been saved for public use.

DEPOSITORIES OF PUBLIC DOCUMENTS.

Provision is now made for one depository of public documents in each Congressional district, designated by its Representative, and two at large in each State, designated by Senators, additional to the several State and Territorial libraries. These depositories receive a copy each of nearly every document ordered by Congress, the notable exceptions being the Congressional Record, Statutes at Large, and bound volumes of the Official Gazette. It is probable that most of them receive the Gazette, as issued weekly, by designation of members of Congress to the Commissioner of Patents. But the receipt by depositories of the Record and Statutes is very precarious, depending upon the courtesy of members of Congress, by whom alone they are gratuitously distributed. These documents, however, are amongst the most important issued, the certain and regular receipt of which is most earnestly desired by those libraries in which they are in constant demand for purposes of reference. It is therefore recommended that they be added by special resolution of Congress to the documents now being by law regularly supplied to depositories.

It is very much to be desired that documents designated for depositories should be furnished as soon as practicable after they are printed to such depositories, as many of them are amongst the most prominent libraries in the country. Under existing arrangements, however, from one to two or more years usually elapse after printing before they are bound, and so available for distribution. Of all the documents of the first and second sessions of the Forty-eighth Congress, numbering not less than 175 volumes, only 36 volumes of the first session have yet been received from the Public Printer. In view of the fact that it is more important, so far as public interests and convenience are concerned, that public libraries rather than private individuals be supplied promptly with the current publications of the Government, it would seem that those designed for depositories ought to be given precedence in the matter of binding over others, excepting those required by Congress for legislative purposes. It is therefore suggested that such action be taken by Congress as will secure this result.

If delay is occasioned by the fact that the index designed for insertion in each volume cannot be prepared till the last volume of each series is printed, then it is suggested whether it would not better subserve the public convenience to have the indexes published separately, in a volume by themselves, and thus allow the individual volumes to be bound as soon as printed. It is to be noted that the indexes referred to are not those of each separate volume, but of the series of executive
